## **READ BEFORE INSTALLATION**

### **VN L CUSTOM**

Thank you for purchasing a Jones Performance Truk-Rodz custom hood. Our mission is to make your truck look unique, personalized your way. So please read the following information before installing your Truk-Rodz Custom hood.

**This is a custom hood so it *MUST* be fit before painting.**

#### **SIDE AIR INTAKE**

Your new Custom hood has a unique air intake system, which will increase the volume of air to the motor. The dual air intakes are fully functional. This design is different than your original equipment hood and will give you a completely different look than any other truck on the road. **The OEM side air intake screens will not work with this hood.**

#### **WHEEL OPENING**

Our wheel opening is made for regular tires. If you have floatation tires you will have to cut the wheel opening larger to match to your fender extensions.

#### **INSULATION**

If you install the insulation to the sides of the hood you will have to modify the insulation to fit.
