**BEFORE MOUNTING!!**  
HOOD TO TRUCK

**Thank you for purchasing a Jones Performance quality truck hood.**

We have attached the insulation retainers to your hood and enclosed the plastic washers. The four center retainers will line up to the holes in your O.E.M. insulation. The lower four will need to be inserted through the insulation.

We would greatly appreciate it if you could distribute the survey cards that were enclosed with your new JP hood to the proper party (Owner or Installer) and have them filled out and returned. The information and suggestions you provide help us to continually improve our products.

If you have any questions, suggestions or comments please contact us at 1-800-451-1600.
