

PLEASE READ
BEFORE MOUNTING!!
HOOD TO TRUCK

Thank you for purchasing a Jones Performance quality truck hood.

Your new Columbia hood is a solid one piece design. This will increase the strength and durability.

Due to the varying models, we have bolted the small splash shield to the inner fender brace. Most models will require this. If your model does not have this splash shield, you will need to remove them.

We would greatly appreciate if you could distribute the survey cards that were enclosed with your new JP hood to the proper party (Owner or Installer). Please fill out and return. The information and suggestions you provide help us to continually improve our products.

If you have any questions, suggestions or comments please contact us at 1-800-451-1600.
